Good game. Simple.

Very nice graphic and sound.. Sometime works, sometime not.. A fun little time killer that manages to suck way more hours than you might expect.. Yet another Luxor game! As usual, this is a coloured ball matching game aimed at ultracasual gamers, much like Peggle and Bejewelled/Candy Crush. You shoot coloured balls at a row of balls flowing along a rail. When the balls on the rail reach the end, the game is over, but you can remove balls from the rail by matching 3 or more of the same colour.

Luxor 3 is still a bit dated, runs at fixed resolution, and what's worse, uses a stretched aspect ratio on a widescreen monitor. Because of those deficiencies, I can't recommend this one.. If you have windows 7 x64 bit os do not buy as it does not work it is the only reason I have given this game a negative, I have recently asked for a refund. If you have an xbox you can pick up a copy of this game for literally pennies do not bother with if you have the affor mentioned os. There is also no plans to fix the problem either. save your hard earned money and get something else.. A fun little time killer that manages to suck way more hours than you might expect.. Better than the first and the second ones, it still isn't a casual game. Far from it. So the devs should think twice before appling this tag.. cool little casual game not very strenuous even on hard

68V100. Casual ball-popping game. Nothing special. Doesn't work on Windows 7 x64.. Those who love the classic game of luxor or matching up colors in order to clear out lines of moving gems will love this game. Lots of power ups that will help you gain more points and move onto more fast and exciting levels.

run smoothly in windowed mode on Windows8.1 x64

Simple and fun game. A classic match 3 franchise that made up a majority of my childhood, I can always recommend this entire series (minus Luxor Mahjongg). The best luxor game out of the series. If you like games like luxor, don't pass up on this gem!. Nice casual game. :). I really do not care for this one. I think it needs an HD upgrade with more screen resolutions because playing this in a stretchy screen or windowed mode just isn't cutting it. Also, I do not like the huge cursor/aimer, it's very distracting. I don't see myself playing all the way through on this one like I did on the two prior.. I think I got this on sale for a few dollars. It's a fun simple game and even people who don't like games will enjoy it. Let your non-gamer family members try this.. Simple, casual game :3
